

DO YOU WANT TO IMPROVE PROJECT EXECUTION?

When the number of projects or interfaces increases and the complexity grows. It becomes more difficult to have the necessary overview and be able to take the right decisions when needed.

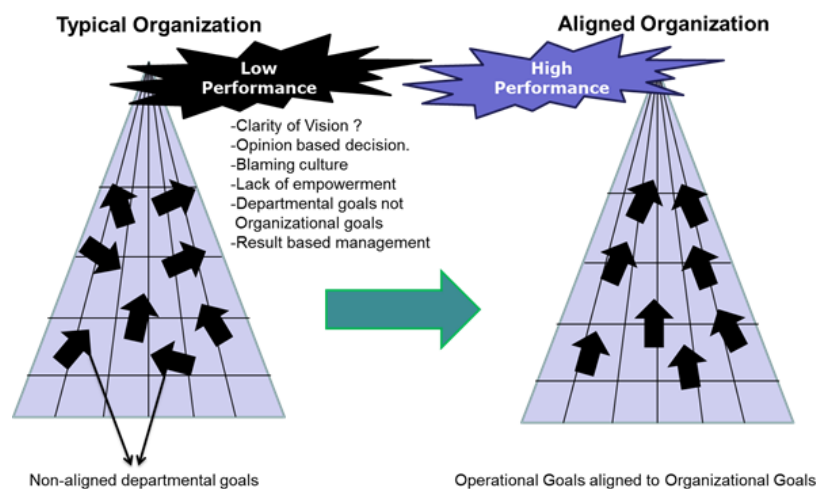

We, in Zephyr Consulting, have developed a new concept based on a combination of military tools developed through centuries and new knowledge on how to enhance the power of execution.

The concept in short:

- Based on TRUST and collaboration
- Transfer the strategic/overall long term targets to tactical targets.
- Enhances transparency, ownership and a dynamic execution process.
- Can be scaled up and down without losing sight to priorities and direction.
- It integrates and encourages cross-functional co-operation to achieve high performance for the team / organisation as a whole.
- Everything is transparent and allow the team to have the right discussions
- Progress is carefully monitored and creates a foundation for taking the right proactive decisions when needed.

Collaboration room for O+G megaproject 5 billion USD

The concept has been used within projects up to 5 billion USD and have given the projects three-figure mio savings (DKK), because of transparency and the ability to react proactively. (Renewables and Oil & Gas). - Do you want to know more ?
